

Alarm Clock Charger Charger

Two versions of the charger are available, both are mains powered with battery backup and enable the Pager to be recharged whilst still providing notification to the user of monitored events such as the fire, phone and baby alarm via the vibrating pillow pad.

Both charger options confirm the Pager is correctly docked by giving three shakes of the Vibrating Pillow Pad.

The Alarm Clock Charger has all the functions of the basic Charger with the addition of backlit function keys and a digital alarm clock with snooze function. The new LED display is viewable in all lighting conditions.

- Low profile ergonomic design
- Pillow Pad option
- Mains failure backup
- Digital alarm clock option
- Snooze facility
- 1 year warranty
- Free Technical Helpline

Vibrating Pillow Pad (Available separately)
