

Care Call Magnetic Door Monitor

This compact battery operated wireless door monitor is simple to fit and discreet. Powered by a 9V battery, the unit will send a signal to the Pager or portable SignWave each time the magnet passes by the Monitor.

The Magnetic Door Monitor is ideal for use when caring for someone who may wander, or in any situation where a person may need to be alerted to the opening of a door or window.

The Monitor will also alert the user when the internal battery needs replacing.

- Simple to install
- Discreet
- Automatic low battery signal to Pager or SignWave
- 1 year warranty
- Technical Helpline
- Simple screw fixings included
- Auto battery voltage indication on start-up
